

- 1.0** Additional menu item to be added to current homepage. Use font icon from same set as the other icons.
- 2.0** The Redeem button should be inactive until the available balance is greater than £0. If a user clicks the redeem button in an inactive state, display the error message 'No rewards available to redeem'.
- 3.0** Redeemed awards is the total of all rewards that have previously been used to top-up a card balance and have a reward status of 'Redeemed' in the database.
- 4.0** Pending rewards are those that have been identified as being earned, but where the transaction data was not yet received. These have a reward status of 'Pending' in the database.
- 5.0** Available rewards are those that have been identified as being earned, where the transaction date was ≤ 60 days from the current date, less any amounts that have already been redeemed. These have a reward status of 'Available' in the database.
- 6.0** There are 4 partner logo sections in total (Retail, Fashion, Eating out, and DIY). Carding is Motoring. Each section will have a variable number of partners. Where there are an odd number of logos, the bottom logo should be left aligned.
- 7.0** For non-sterling currencies, the converted amount should be displayed and the rate of exchange displayed as shown.
- 8.0** Clicking 'Done' will take users back to the Rewards homepage.
- 9.0** Available rewards should open in a modal with no navigation to the rest of the app other than being able to close the modal.
- 10** When the modal is closed, the user should be returned to the page where they opened the FAQ's. Where this was from the Transactions pages, the previous filter view (if applied) should be retained.
- 11** FAQ sections should expand and collapse and it should be possible to expand as many sections as required (i.e. do not automatically close sections when a new section is opened).
- 12** Dropdown should allow the user to filter between transaction types (Pending, Available, Redeemed, Refunded and All).
